

Survey on Public Perception of Renewable Energy

We are students of the BAP program conducting a study on Public Perception of Renewable Energy. The purpose of this questionnaire is to understand how people view renewable energy sources, their benefits, concerns, and the factors that influence their support or adoption of these technologies.

Your responses will be used solely for academic purposes and will remain completely anonymous and confidential. There are no right or wrong answers—please respond based on your honest opinions and experiences.

Your participation is voluntary, and you may skip any question you do not wish to answer. We appreciate your valuable time and input
